“Something to Crow About”

The bottom piece of Osnaburg should be cut  $4\frac{1}{2}$ " x  $22\frac{1}{2}$ ". The cutting for the squares for the Crow are correct in the magazine...you are not cutting on the diagonal, but sewing on the diagonal so the size would be  $2\frac{1}{2}$ " square for the areas where the black square is used as a snowball corner. For the HST's cut at 3" and then trim down once sewn.
